Subject: Status Report {Time Period}

Week 1

Accomplishments: {What progress have you made on your assigned tasks?}

We have created a schedule for designing the project and have created the responsibilities. Also, we have created the Project plan for this week.

Problems/Risks: {What problems occurred or what risks exist that my affect the delivery schedule of the product?}

We might not have enough time to finish the project. Also, we might have trouble with creating the GUI for the project or implementing the two game modes efficiently.

Other risks are whether our design is good or needs to be improved, ability to keep pace with the passing weeks as mentioned above.

Next Steps: {What will you be doing during the next week?}

For the next two weeks, we will be designing the layout of the classes (GUI, interfaces, etc.) and starting on some of the classes.

Looking to start coding everything non-gui, giving us sufficient time to familiarize with the concept.
