Status Report 2

Date: May 4, 2020
Development Lead: Mihir Kelkar
From: Vivek Alumootil, Mihir Kelkar

Subject: Status Report 2

Accomplishments: We have created a detailed layout of all the classes and structure for the project. All of the information is contained in the specification document, which has been finished.

Problems/Risks: We haven't started on the GUI details, so that could be challenging. There are also some minor details that may change when implementing the structure (for example, will the player classes implement a player interface?). However, we are only 1 week into the project, so we still have plenty of time.

Next Steps: This coming week, we will be writing most of the code and designing the GUI structure (not writing the GUI code). Since we are not familiar with GUI, we will have to do some research into Java GUI documentation. Structural changes will be made as necessary. If everything goes as planned, all of the initial, non-GUI code will be finished by next week's status report.
